Transitie		Software control & distribution	Programmabeheer en distributie	Release management Configuration management	Release and deployment management Transition planning and support Service asset and configuration management	Service system transition Configuration management

NB:

ASL, ITIL en CMMI-SVC zijn alle bestemd voor de IT-dienstverlener, de aanbodkant van de informatievoorziening.

BiSL is voor de organisatie die IT- diensten nodig heeft, de vraagkant van de informatievoorziening, onderdeel van de businessorganisatie.

De BiSL-processen zijn daarom nooit uitwisselbaar met de processen van de andere modellen. Ze werken er wel mee samen dus interfaceren er wel mee.

Daarom is BiSL ook in dit overzicht opgenomen.
